Deer crashes through hotel window

SIOUX CITY, Iowa (AP) - A deer crashed through a window to become the first guest at a new Sioux City hotel.

The deer crashed through a window at the Hilton Garden Inn, galloped a round a room and destroyed a designer chair.

Hotel owner Larry Miller says workers laying tile on Monday heard a crash down a hall. They rushed to a room and opened the door and came face-to-face with the deer. Miller says the buck jumped through the window and was apparently trying to get out.

A broshure was distributed in the recent hotel/motel tax ballot issue that did not state who paid for it. The brochure was paid for the Webster City Area Development and all paperwork is now on file with the lowa **Ethics and Campaign** Disclosure Board.
